Honda

the Odyssey

Making the best even better took everything we know.

The Honda Odyssey has long set the minivan benchmark—just check out its lengthy list of laurels, honors and awards. And for many makers, that would be enough. But for 56 years, Honda has measured success by a unique philosophy. It's one defined by a desire for innovation, by the joy of discovery and by a **passion** for building truly exceptional vehicles. You see it in how we race cars to learn, as well as to win. It's in our commitment to the environment and in our constantly advancing **safety** technology. And you see it in how we never lose sight of a simple truth that Mr. Honda himself knew so well: Driving should be fun. Odyssey changed the rules, becoming the **smartest choice** for years. Last year, in completely reinventing the Odyssey, we raised the bar even higher—showcasing technologies and features to anticipate needs and exceed expectations. The result was thunderous applause from the critics, including 2005 Best Van among *Car and Driver's* "5Best" Trucks,¹ "2005 All-Star for Minivan" from *AUTOMOBILE Magazine* and much more. You might say we know what it takes to make a winner.

Odyssey Touring shown in Silver Pearl Metallic.

Odyssey EX shown in Redrock Pearl.

We know who never asks for directions.

Odyssey EX with Leather shown in Desert Rock Metallic.

When wide-open spaces beckon, hit the road in a new 2006 Odyssey. Go get lost. Or know exactly where you are without ever having to stop and ask. With the available **Honda Satellite-Linked Navigation System**[®] as your faithful guide, you'll have the comfort of knowing that how lost you really get is completely up to you.

It's a good feeling having those GPS satellites looking out for you. It's just one of the many ways the Odyssey is equipped for mile after mile of **carefree exploration**, long-distance comfort and loads of fun. Climb on in and enjoy a motoring experience unlike any other—one that can turn even the daily drive into a big adventure.

Find your way with the available Honda Satellite-Linked Navigation System.² Its new **flip-down touch screen** is your window to 8.0 gigabytes of maps, 7 million points of interest – and even Zagat Survey[®] restaurant data.³ The voice recognition feature gives you hands-free access to much of that data. Just touch a button, and the screen motors down to reveal the 6-disc in-dash CD changer.

Select a place:

UT-303, GREEN RIVER, UT 2.32 mi ↑

- GOBLIN VALLEY STATE PARK
- CANYONLANDS NAT'L PK-HORSESHOE
- GLEN CANYON NATIONAL REC AREA
- CANYONLANDS NAT'L PK-MAZE DISTR

Global positioning system (GPS) satellites pinpoint your location virtually anywhere in the 48 contiguous states.⁴ Enter a destination, and you're guided there with clear directions and voice prompts. The voice recognition system will recognize **over 700 commands**, like "find nearest gas station." And you can even use it to control the audio and climate systems, and more.

*Some roads unverified. See the navigation system owner's manual for more details on coverage.

When designing the Honda Odyssey's interior, we focused on function and creature comfort. So there's smart design like an easy-to-reach and out-of-the-way dash-mounted shifter. Add luxuries like the EX-L model's **leather seating** with heated front seats for chilly mornings.

With a full life and a full van, it seems you never have trouble filling up the glove box too. So the Odyssey offers up **dual glove compartments**. They'll help you keep things organized, and will give you plenty of storage space for all your maps, tools, pens and to-do lists.

Odyssey Touring interior shown in Ivory Leather with available Honda Satellite-Linked Navigation Systems.²

Just about as good as eyes in the back of your head, the new **conversation mirror** (most models) pulls double duty as a flip-down sunglasses holder. **HomeLink[®]** buttons on select models stand by, operating up to three remote-controlled devices, like garage doors.

Call it extra convenience or "driver-focused design" –some things just make sense. Like Odyssey's **steering wheel-mounted** audio-system, cruise and voice-recognition controls (with the available navigational system). They help keep your hands on the wheel and your eyes on the road.

Before you even step inside, the '06 Odyssey obeys commands through a key fob that operates the door locks, the power sliding doors on most models and even the Touring model's **power tailgate**. Vents and lights for all three passenger rows, and a **tri-zone climate control system** in select models, get everyone in their very own comfort zone. Touring models even have a programmable multi-information display, complete with compass and a miles-to-empty function. Whether driving or riding, this is the place to be.

When you want a fresh perspective, slide back the Odyssey's large **power moonroof** on models with leather. It's yet another motorized marvel in the Odyssey's bag of tricks—like power windows, mirrors and door locks. And all that power is placed right at your fingertips.

Here, entertainment is no afterthought. Standard in LX is a 120-watt AM/FM/CD system, and the EX model adds 2 more speakers and a 6-disc-in-dash CD changer. Taking center stage in Touring models is a **360-watt premium audio system** with 7 speakers, including a subwoofer. And select models even get XM® Satellite Radio or are XM ready.® for an accessory receiver. XM has over 150 digital-quality channels, commercial-free music, plus real-time traffic and weather reports. And the available Honda DVD Entertainment System – standard on Touring models – boasts an impressive **9-inch screen**. So the pack in back can get in on big fun.

Image courtesy of Universal Studios

We've given gadget lovers lots to love. On the factory-integrated Honda DVD Entertainment System, the control panel faceplate becomes a **remote control**. In addition, you technophiles can have both the Honda DVD Entertainment System and the Honda Satellite-Linked Navigation System² on models with a leather interior. The Odyssey will do it all, and now, you can have it all.

Thoughtful technological touches help set the Odyssey apart, like lightweight **wireless headphones** featuring Personal Surround. They turn on and off with a twist, and fold flat to store easily. Rear passengers can enjoy DVD movies or other audio sources without disturbing the driver. And with the rear audio/video inputs, they can even play **video games** or view virtually any other media source.

Passengers get easy access through the **power side doors** on most models. And drivers will be quick to get situated, too, finding a perfect fit thanks to the adjustable steering column and an 8-way power seat on all EX models. Whether

you're long of limb or shorter in stature, we want the Odyssey to fit its driver as best it can. So check out the innovative **power adjustable pedals** on the Touring model that can move the gas and brake pedals closer to your feet.

We know clutter happens to the best of us.

Sure, the '06 Odyssey is **luxurious** and loaded with high-tech Honda thinking. But you know as well as we do that life is never clutter-free. So we also focused on pure function, finding smarter

ways to anticipate life's demands—like at least **15 beverage holders**, and clever in-floor storage. Just a couple examples of the ways the Odyssey can help in your fight to keep it clean.

Odyssey Touring interior shown in Gray Leather with available Honda Satellite-Linked Navigation Systems.²

Inside the Odyssey, your passengers are in for a few treats. Seating is not only luxurious, but highly configurable, with room for up to eight in EX models, thanks to a stowable 2nd-row **PlusOne Seat**.™ Remove it and you create some extra space between the two deeply padded, full-size second-row seats. In fact, the Odyssey's second row treats you like first class—even on long trips.

When you're ready to reconfigure, the Odyssey can meet the challenge in a multitude of ways. For starters, EX models let you move the handy PlusOne Seat to the storage area in the floor. The second-row center console in Touring models can be removed for extra space. And then you can really get creative, because Odyssey offers a huge variety of passenger and cargo possibilities.

Pull out the PlusOne Cushion.

Give the second row a tray.

Or fold it all up to make space.

The in-floor storage is flexible.

So it's there when you need it.

An **8-way power-adjustable driver's seat** on most models makes chauffeur duty a joy. Touring models also have a memory feature that can accommodate the favorite settings for two drivers. The removable second-row seats can push together, pull apart and slide up for easy third-row access. And a 60/40-split third-row **Magic Seat**® folds flat in one motion to make a big cargo area—without removing the head restraints.

The Odyssey features abundant storage space.* There are door pockets, seatback pockets (EX and Touring) and a flip-down tray between the front seats that even offers handy bag hooks. Touring models come with a unique **second-row center console** that ups the ante with its bigger beverage-holding, CD/DVD-storing, tray-providing capabilities. And it's a snap to remove to make more floor space. So you can take it or leave it.

*Honda reminds you to properly secure items stored in the cargo area.

The Odyssey puts a fresh spin on space. Most models come with an ingenious **Lazy Susan rotating storage area** in the hidden in-floor storage space. Stow kids' games, dog toys, work stuff or play stuff. It's large enough to hold lots of things, keeping them organized and out of the way—but quickly accessible. If you want a single **larger storage area**, you can remove the Lazy Susan altogether. And the cover is lockable, making it a great place to keep valuables out of sight.

We all know that moving people is also about moving people's stuff. And the Odyssey's huge capacity makes it a better **utility** vehicle than many SUVs. Take the whole crew—it seats up to 8 people (EX)—or reconfigure the rear seats to carry loads of luggage, camping gear, or whatever the day's agenda demands. On Touring models, a new **power tailgate** gives you access to 147 cubic feet of cargo room with the second-row seats removed. How's that for a big idea?

The 2006 Odyssey's dual sliding doors feature the comfort and convenience of **power second-row windows**, offering more rear passenger control. The sunshades on most models can help protect against unwanted glare.

The Odyssey Touring model has a **115-volt rear power outlet** in the third row. You can use it to directly power electronic devices like the kids' video game console, or to power a laptop or other electronics. You'll never need to lug around a power inverter again.

We know
who won't
hang up
the driving
gloves.

Odyssey EX shown in Slate Green Metallic.

You want versatility, but you also love to drive. With a **244-hp engine**, the Odyssey moves with an eagerness that belies its big capabilities. And that engine is packed with the latest innovative Honda engineering, so you get all that power with efficiency, economy and lower emissions, too. And when the

road curves, you'll enjoy responsive handling inspired by European luxury sedans. With its rack-and-pinion steering, a 4-wheel independent suspension with double wishbones in back and powerful 4-wheel disc brakes, the new Odyssey performs like it doesn't even know it's a minivan.

You could call Odyssey the hot rod of minivans. Its heart is a potent 3.5-liter V-6 engine that showcases high-tech Honda thinking like a new **Drive-by-Wire Throttle System™** for smooth power delivery. And its **5-speed automatic transmission** offers you enhanced acceleration as well as economy.

Odyssey Touring shown in Nighthawk Black Pearl.

A drive in the 2006 Odyssey is just as refined as it is inspiring. A **rubber-isolated rear subframe** provides a smoother, quieter ride. Sleek aerodynamics decrease wind noise. And Odyssey models with our Variable Cylinder Management™ (VCM™) technology are also equipped with an electronic **Active Noise Cancellation (ANC)** system that helps control engine noise within the passenger cabin.

Honda is well-known for engines that blend high performance with **durability** and efficiency. The powerplant specially created for this latest Odyssey is a prime example, producing up to 244 hp and 250 lb-ft of torque – **on regular gas** – for quick, confident passes and a 3,500-lb. towing capacity.* And you also get great fuel economy! an Ultra-Low-Emission Vehicle (ULEV-2) rating, and a 105,000-mile tune-up interval.*

V-6 - 3 = 28 mpg^{7,8}

You knew it before you did the math: Smaller engines use less fuel. And that's the idea behind Honda's brilliant **Variable Cylinder Management (VCM)** system⁶ – the brains directing the 3.5-liter i-VTEC[®] engine standard on Odyssey models with leather interior. Powered by the intelligence of i-VTEC technology, VCM quickly and seamlessly activates or deactivates the three rear cylinders, depending on the driver's demands. So you get the **best of both worlds**: V-6 power when you're accelerating or climbing, as well as the efficiency of a smaller engine while cruising.

Cruise under light engine loads and VCM deactivates the three rear cylinders. The intake and exhaust valves remain closed, while fuel injection is paused. This can help deliver an EPA highway mileage rating of **28 mpg**.¹⁸ With Odyssey's 21-gallon fuel capacity, that makes for a long way between gas stops.

VCM works without the driver even noticing it's there. When accelerating, all six cylinders of the 3.5-liter V-6 are firing, providing all the exhilaration of **244 hp** and 240 lb-ft of torque. Trademark Odyssey performance – for brisk highway passing or strong towing – is never compromised.

*Does not apply to fluid and filter changes. See your owner's manual for details.

We know that
safety means
expecting the
unexpected.

With Michelin® PAX® System,* standard on the Odyssey Touring model, you'll enjoy a great new level of confidence driving in an uncertain world. In the event of a puncture, you can still travel at **50 mph up to 125 miles**. Its specially designed larger wheel contains a flexible support ring and is anchored to a unique low-profile tire that even enhances handling. PAX System is the latest in run-flat tire technology— and has been featured on some of Europe's most luxurious vehicles. Touring models also feature Honda's Tire Pressure Monitoring System (TPMS), which monitors each tire and alerts the driver of the specific tire with low pressure.

*Odyssey Touring shown in Ocean Mist Metallic.

Honda has long been an industry leader in developing and applying advanced safety technology. Ongoing research at the sophisticated Honda R&D laboratories is playing a critical role in the continual evolution of our automotive **Safety for Everyone** effort. Through a comprehensive and evolving approach to safety, Honda seeks to provide a

high level occupant and pedestrian protection in our cars and trucks, regardless of size or price, as well as increased crash compatibility with other vehicles. And no fewer than six Honda models have received **5-star crash-test ratings** from the National Highway Traffic Safety Administration (NHTSA).*

*Government star ratings are part of the National Highway Traffic Safety Administration's (NHTSA) New Car Assessment Program (NCAAP), found at safercar.gov.

Front airbags inflate and deflate in a fraction of a second.

Front airbags,* front side airbags and 3-row side curtain airbags with a rollover sensor are standard. The dual-stage, dual-threshold front airbags deploy at one of two rates and thresholds depending on the severity of impact and seat-belt use. The Occupant Position Detection System (OPDS) helps prevent deployment of the passenger's side airbag if a child or small adult is in the airbag's deployment path.

*Honda reminds you and your passengers to always buckle up.
Children 12 and under are safest when properly restrained in the rear seat.

On navigation system-equipped models, the navigation screen doubles as a display for the innovative, full-color rearview camera. When you shift into reverse, the screen offers a clear view of the area immediately behind the vehicle. Parking sensors in Touring models also help keep you more aware of your space.

Every 2006 Odyssey features Honda's sophisticated Vehicle Stability Assist (VSA[®]) system. Working with ABS and electronic throttle control, VSA **enhances stability** by detecting oversteer or understeer, and braking individual wheels and/or reducing throttle to help restore the driver's intended path of travel.

The Odyssey's rigid safety cell is engineered to maintain its size and shape in multiple crash directions, and to **resist the intrusion** of crash forces in the event of an impact.

Honda's Advanced Compatibility Engineering™ (ACE) body structure incorporates a front-end frame structure that absorbs and disperses crash energy over a larger area. ACE increases Odyssey passenger protection, and makes it **more crash-compatible** with vehicles of differing ride heights.

The Odyssey's **front and rear crush zones** are engineered to absorb and dissipate impact energy, helping to protect the passenger compartment.

The Odyssey showcases some of our latest innovations designed to give drivers an extra degree of protection and peace of mind. They include anti-lock braking (ABS) with a brake-assist feature, Vehicle Stability Assist (VSA) and 3-point seat belts at all seats. The Lower Anchors and Tethers for

Children (LATCH) system on select seats helps ease installation of compatible child seats, and there are tether anchors on other seats. So with its rigid structure, ACE body engineering and long list of passive and active safety features, Odyssey helps you face an uncertain world with greater confidence.

Odyssey EX-L shown in Sage-Brush Pearl

On top of being lauded by the automotive enthusiast press for its excellent performance on the road, the Odyssey is also impressing those with an eye on the bottom line. *Automotive Lease Guide*, for instance, awarded its Minivan Residual Value Award to the 2005 Odyssey.¹⁸ It also garnered a **Best Buy** in the minivan category from *Consumer Guide*.¹⁹ And no less an authority on money than *Money*[®] magazine counted the Odyssey its 2005 Best Minivan.²⁰ So Odyssey's just as smart as it is fun.

Odyssey LX:

244-hp, 3.5-Liter, 24-Valve, SOHC VTEC[®] V-6 Engine • 5-Speed Automatic Transmission • ULEV-2 Emissions Rating • Anti-Lock Braking System (ABS) with Electronic Brake Distribution (EBD) and Brake Assist • Drive-by-Wire Throttle System • Vehicle Stability Assist (VSA) with Traction Control • 4-Wheel Independent Suspension • Advanced Compatibility Engineering (ACE) Body Structure • Front, Side and Side Curtain Airbags with Rollover Sensor • 120-Watt AM/FM/CD Audio System with 4 Speakers • Power Windows (Front- and 2nd-row) • 15 Beverage Holders • In-Floor Storage (2nd-Row) • One-Motion 60/40 Split 3rd-Row Magic Seat • Air Conditioning • Cruise Control

Odyssey EX:

Adds to or replaces LX features:

Power Sliding Doors • 120-Watt AM/FM/XM Ready[®]/6-Disc In-Dash CD Changer Audio System with 6 Speakers • Tri-Zone Climate Control (front: dual automatic, rear: manual) • Heated Power Mirrors • HomeLink Remote System² • Conversation Mirror with Sunglasses Holder • Steering Wheel-Mounted Audio Controls • Ambient Console Lighting • Driver's Seat with 8-Way Power Adjustment • Stowable 2nd-Row PlusOne Seat • Integrated Sunshades (2nd-Row) • In-Floor Storage with Lazy Susan

LX roof rack panels are black, body-colored in EX. Door handles and washer hoses are body-colored in EX. Black in LX.

Dealer-Installed Accessory Packages

The dealer-installed **EX Sport Package** can begin the transformation of your Odyssey into an action-oriented machine. It adds versatile roof rail crossbars, a fog-light kit and an auto day/night mirror.

Or have your dealer install the **EX Lifestyle Package** (not shown) and treat yourself to extras like a handy PlusOne console for the second-row seats, a cargo board and an auto day/night mirror.

The **LX Convenience Package** adds a security system, a leather steering wheel cover and a roof rack. If installed at the time of vehicle purchase, accessories and packages are covered by Honda's 3-year/36,000-mile limited warranty.[¶]

Your dealer's team of trained technicians is at the ready to help keep your Honda in superb shape. All 2006 Honda vehicles – and any Genuine Honda Accessories installed at the time of purchase – are covered by the 3-year/36,000-mile New-Vehicle Limited Warranty.[¶] Plus, Honda cars and trucks are covered by a 5-year/60,000-mile Limited Powertrain Warranty, too. For more information or assistance, see your Honda dealer or please give us a call at 1-800-33-Honda.

HONDA Financial Services

Whether you buy or lease a Honda vehicle, **Honda Financial Services** can assist you with the process. Please ask your dealer which lease or purchase plan best suits your needs.

HONDA Care

Honda Care[®] is a highly affordable, comprehensive vehicle and travel protection plan backed by Honda reliability, service and parts. Please see your dealer for all the details.
